Student Guide to the Academic Aptitude Test 2025-2026

introduction

Out of Kuwait University's commitment to enhancing the quality of education, the Academic Aptitude Tests were introduced as a fundamental step to accurately and fairly assess students' levels

Kuwait University began implementing the Academic Aptitude Tests in the academic year 1996/1997, followed by the introduction of the Equivalent Average System in 1998/1999. These initiatives came after extensive studies undertaken by the University Administration and the Ministry of Education, with the aim of improving the quality of student intake into the university.

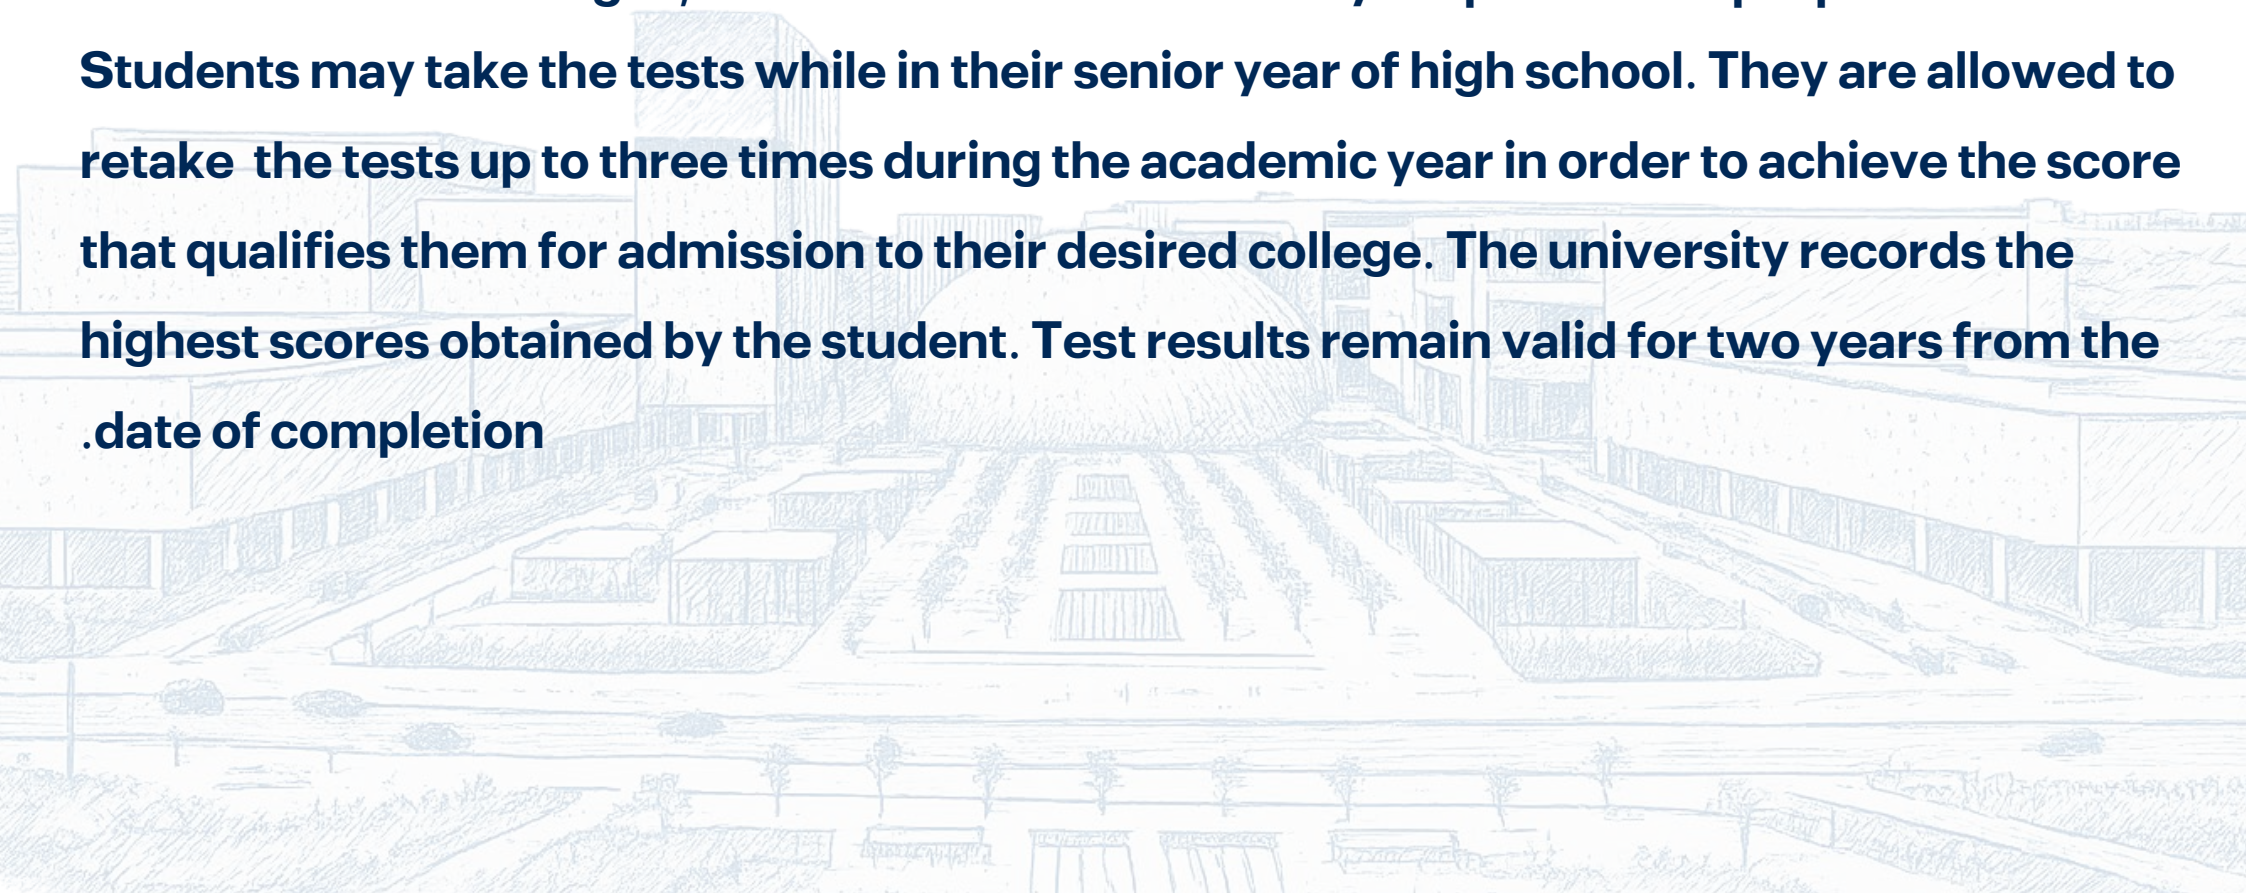

The Academic Aptitude Tests aim to assist students in choosing the university major that best matches their academic abilities and personal skills. This contributes to ensuring fairness in admissions, reducing cases of academic difficulties and dropout, and raising the overall academic standard.

This guide serves as a reference for students and their parents, outlining the importance and objectives of the test, the required subjects, the mechanism for calculating results, and the registration regulations. It ensures clarity of procedures and helps students prepare effectively for this important stage in their educational journey.

The Importance of the Academic Aptitude Tests

Most colleges at Kuwait University consider the results of the Academic Aptitude Tests as one of the admission criteria, as these results are included in calculating the Equivalent Average, which combines the student's high school percentage with their Aptitude Test scores. In some colleges, these results are used solely for placement purposes.

Students may take the tests while in their senior year of high school. They are allowed to retake the tests up to three times during the academic year in order to achieve the score that qualifies them for admission to their desired college. The university records the highest scores obtained by the student. Test results remain valid for two years from the date of completion.

Objectives of the Academic Aptitude Tests

- The Academic Aptitude Tests provide students with the opportunity to assess their academic level in certain core subjects and help them choose the scientific or literary majors most suitable for them.
- These tests contribute to raising students' academic standards by enabling them to overcome the challenges of university study they may face during their first year of enrollment in various colleges, thereby reducing cases of academic difficulties and student dropout.
- The Academic Aptitude Tests also serve as one of the selective admission tools, as the results and related studies allow colleges to identify and distinguish the students most capable of succeeding in their programs from among the top applicants.

Tests

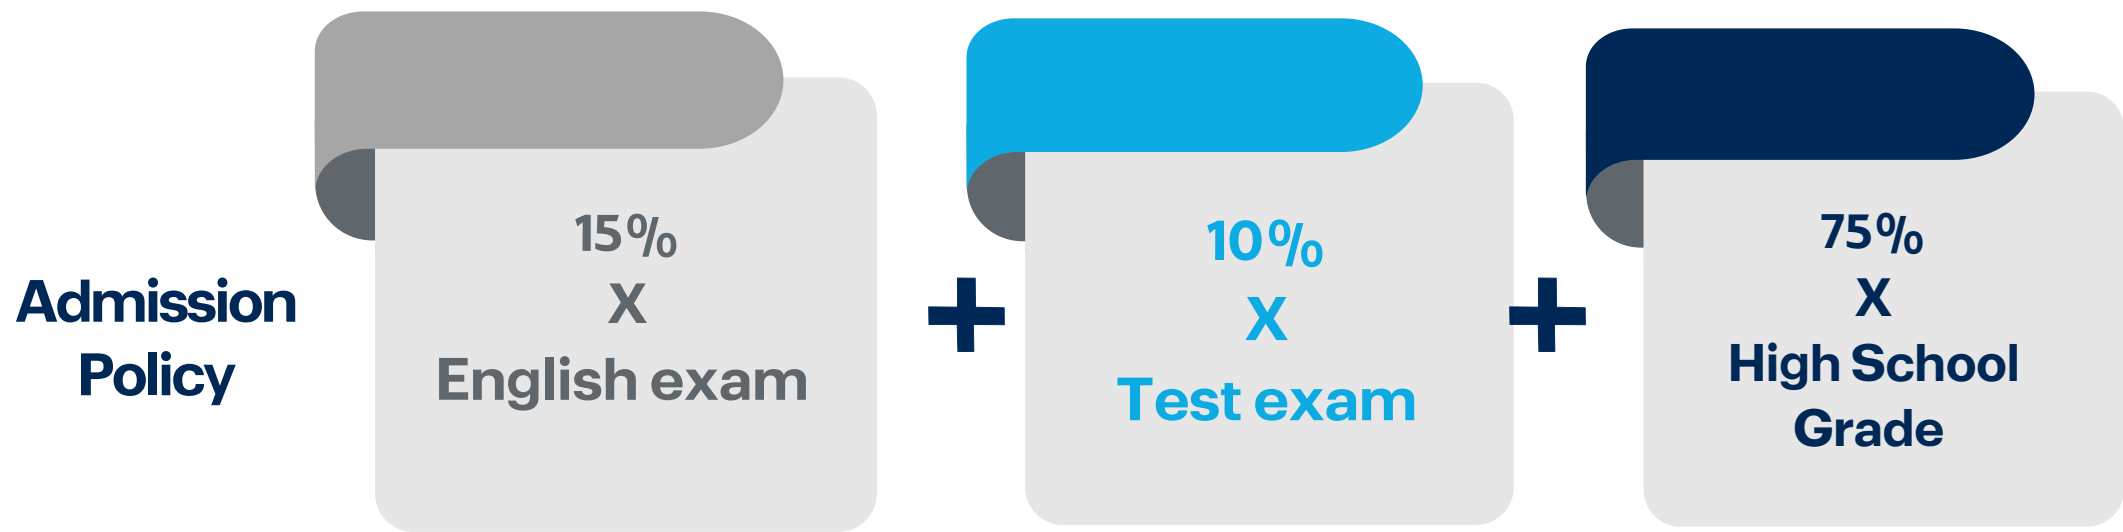

The tests available for registration include Mathematics, English, Arabic, and French, which is offered twice a year, in addition to Chemistry, which is available for students admitted to the university in majors that require a placement test in Chemistry. Students may also access test topics and past exam samples through the official Kuwait University website, on the page of the Office of the Assistant Vice President for Academic Affairs for Evaluation and Measurement, under the section "Test Samples."

Calculation of Test Results

The passing score is set at **60%** for the English test, and **50%** for the Mathematics, Arabic, French, and Chemistry tests. The highest score achieved by the student in each subject is considered, provided that it does not exceed a validity period of two years. The Equivalent Average is calculated by combining the student's high school percentage with the results of the Aptitude Tests.

Sample Calculations of the Equivalent Average

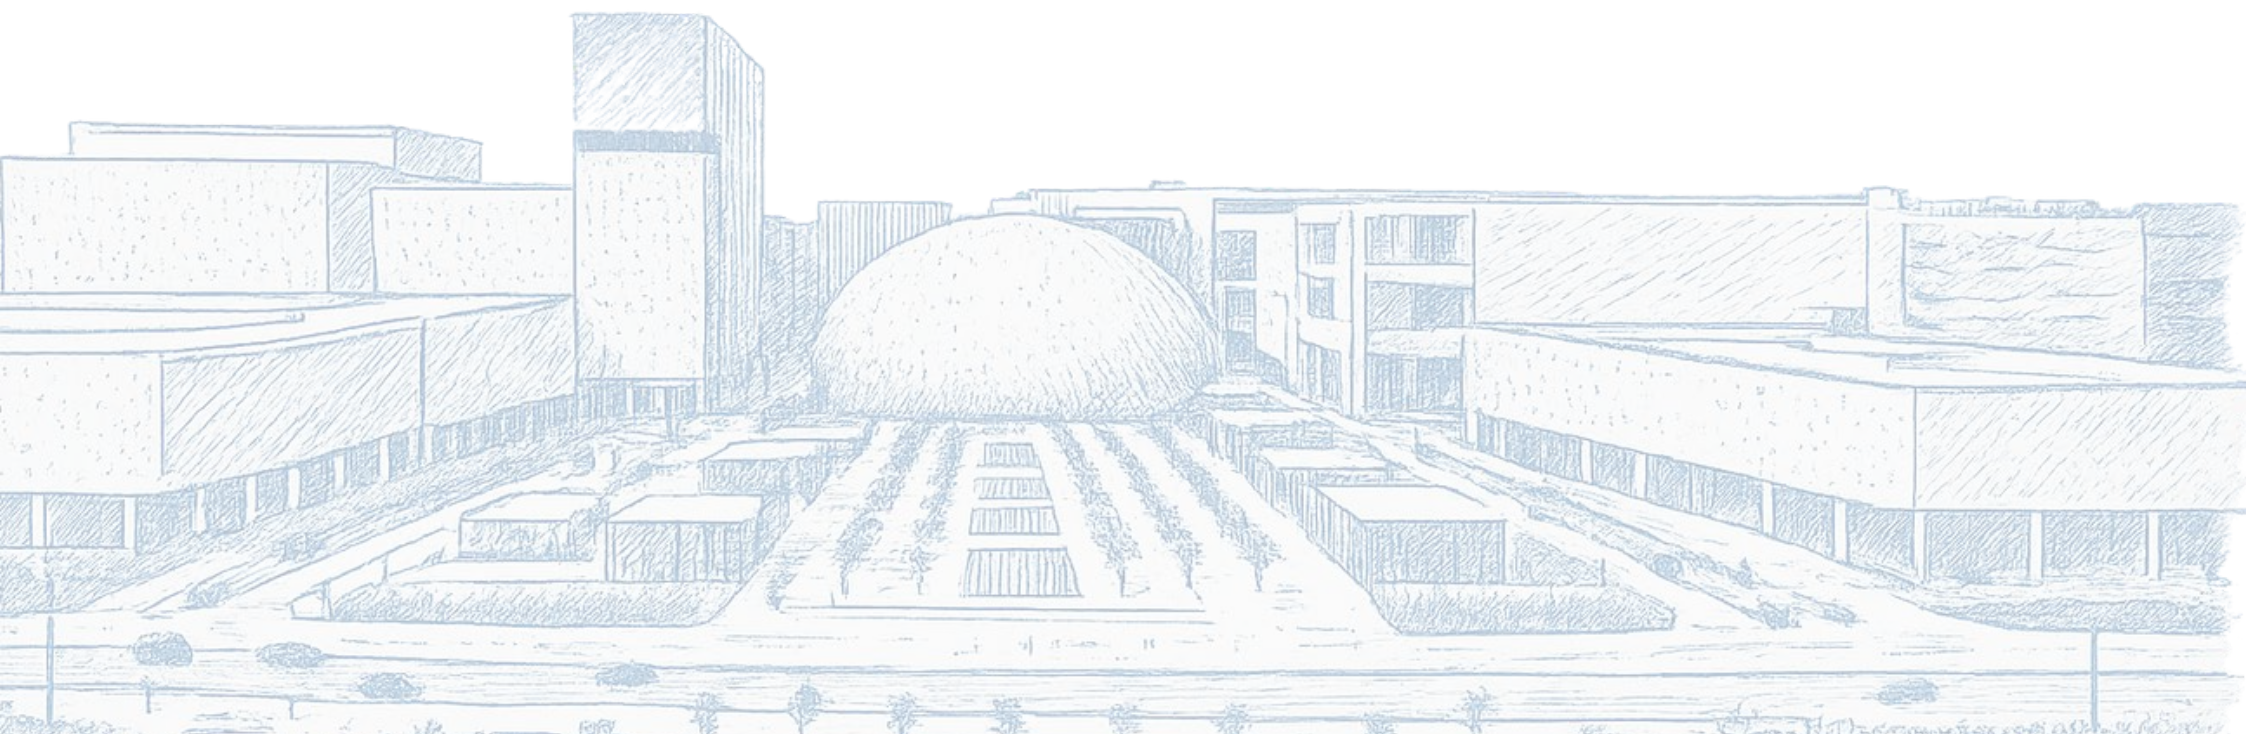

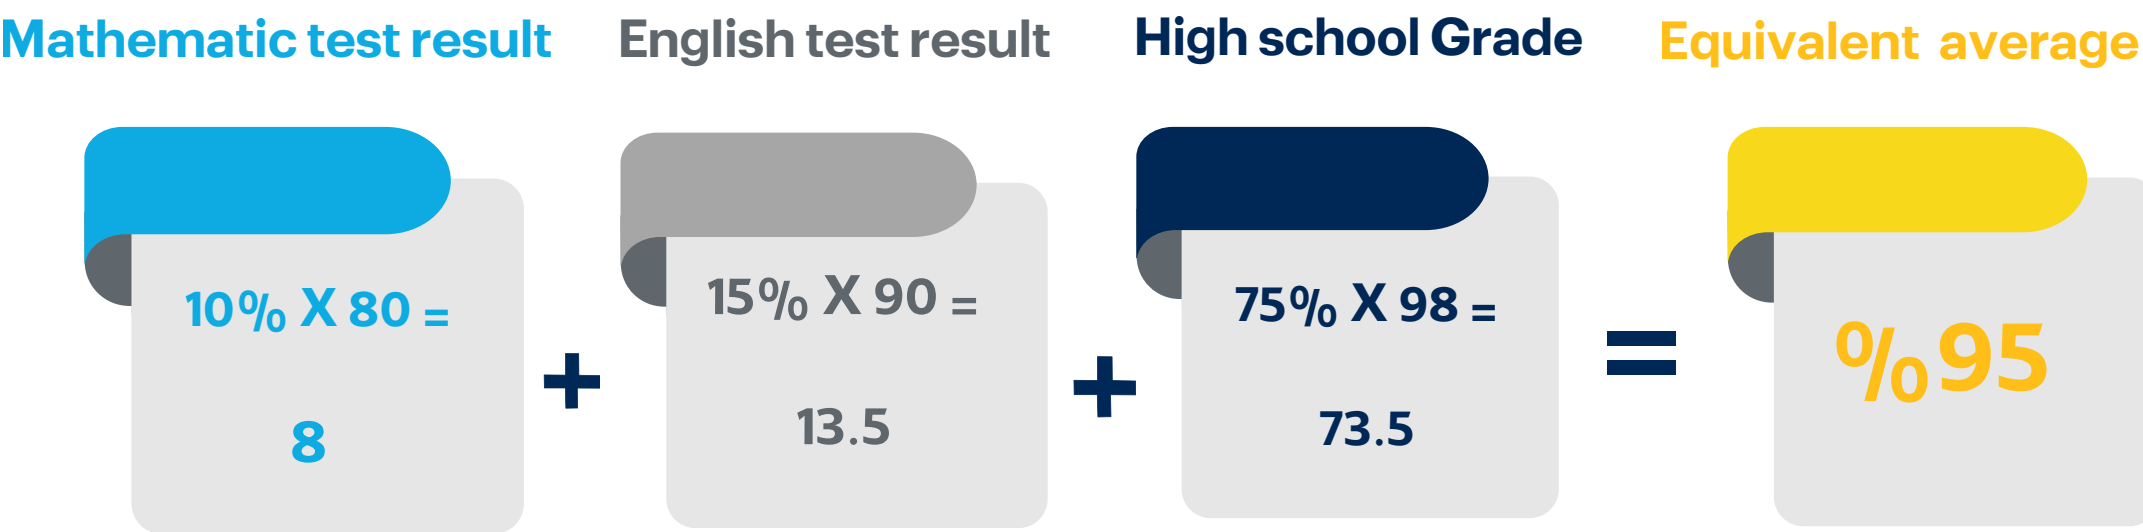

College of Medicine :

Example:

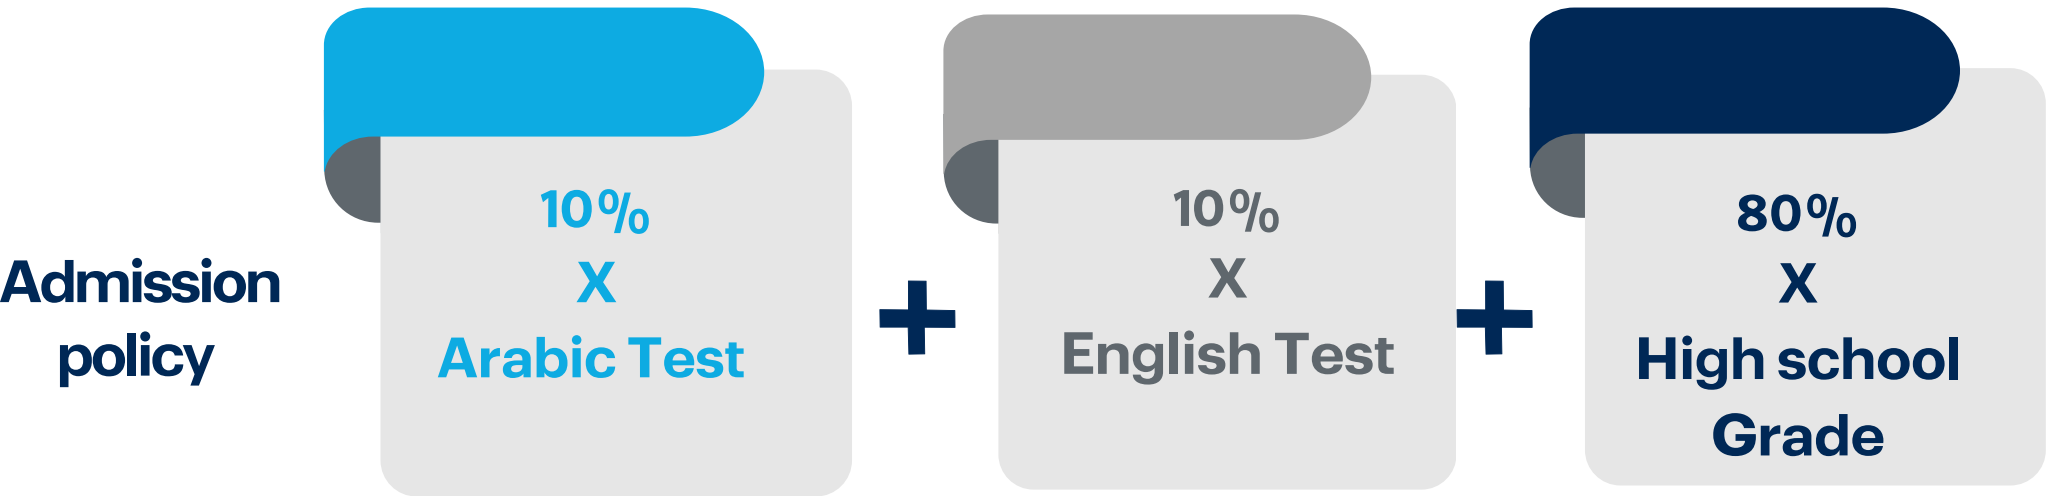

student with a High School Percentage of 98% achieved the following results in the aptitude Test

Mathematics : 80% English :90%

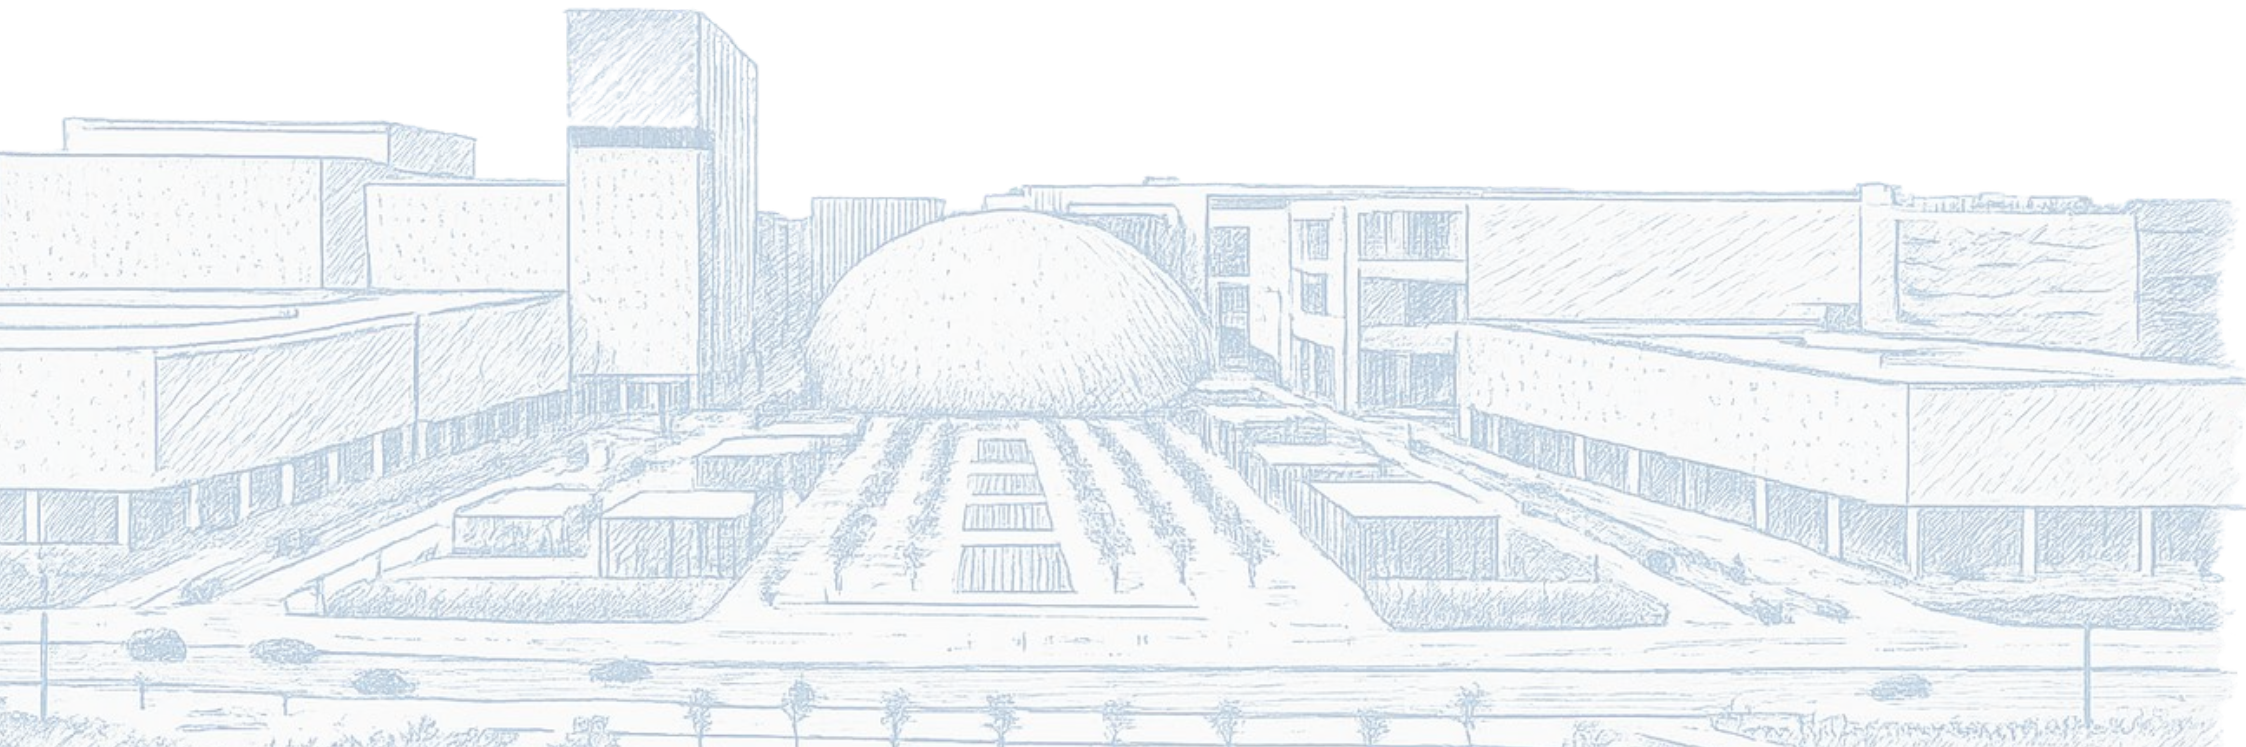

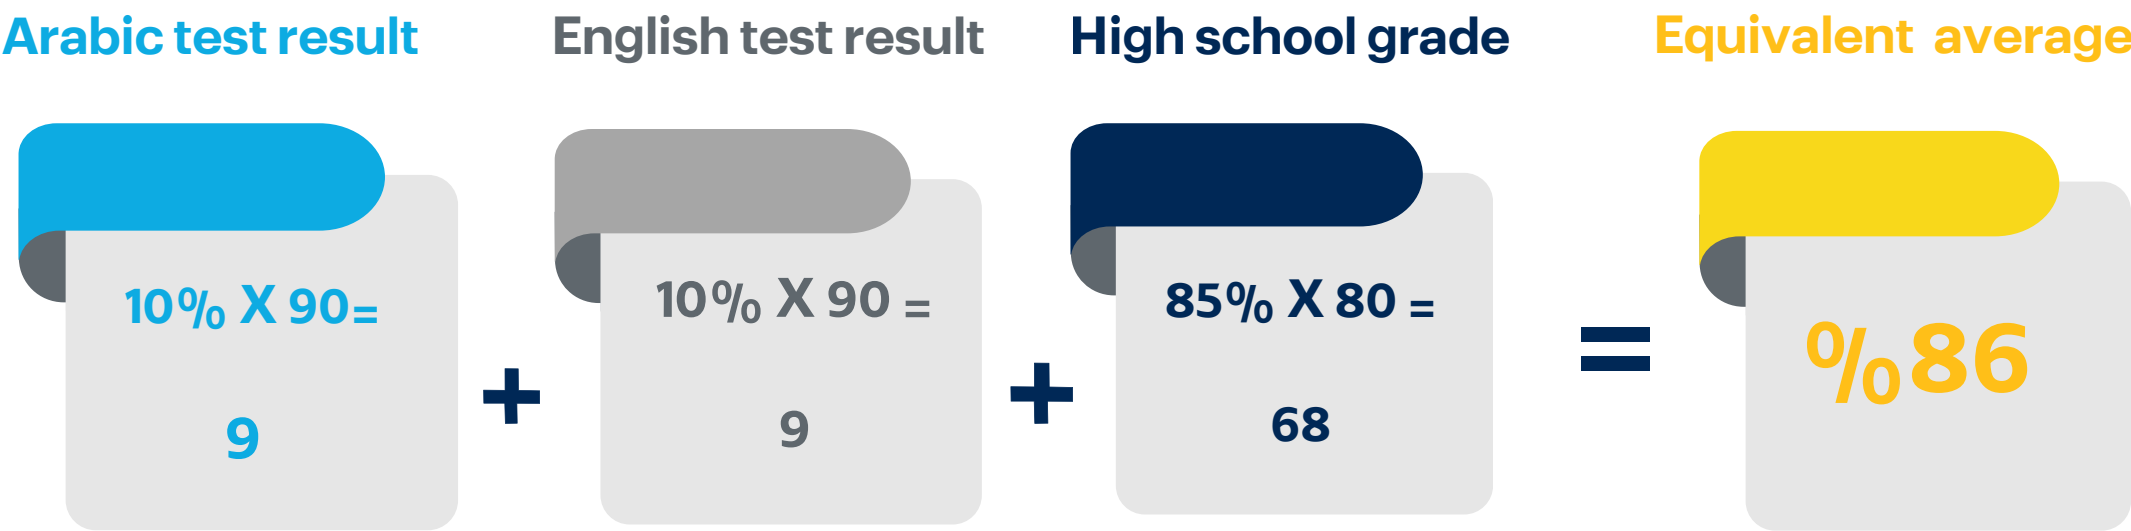

Sample Calculations of the Equivalent Average

College of Eductaion (Arts)

Example:
student with a High School Percentage of 85% achieved the following results in the aptitude Test

Arabic: 90% English :90.6%
